OPTEX FA CO., LTD. is the core company driving the industrial automation business of the OPTEX GROUP.

We specialize in the development and supply of factory automation sensors, non-contact thermometers, IO-Link masters, and machine vision LED lighting.

Our technologies help manufacturers around the world improve efficiency, quality, and productivity.

We are guided by customer needs and deliver practical and effective solutions through advanced sensing and digital technologies.

Our corporate philosophy, which values customer satisfaction, company growth, and employee well-being, continues to shape everything we do, from innovation to service.

By combining on-site expertise with fresh ideas, we are committed to supporting next-generation manufacturing through reliable and forward-thinking technologies.

Tasuku Yuguchi
CEO

OPTEX FA: CORPORATE PROFILE

OPTEX FA CO., LTD. began as the industrial photoelectric sensor division of its parent company, OPTEX CO., LTD.

Later, SICK OPTEX CO., LTD. was established as a joint venture with SICK AG of Germany, the world's leading industrial sensor manufacturer.

Through this partnership, our development and technological capabilities were highly recognized.

In 2002, we became independent as **OPTEX FA CO., LTD.** Building on the know-how and experience gained through technical collaboration with one of

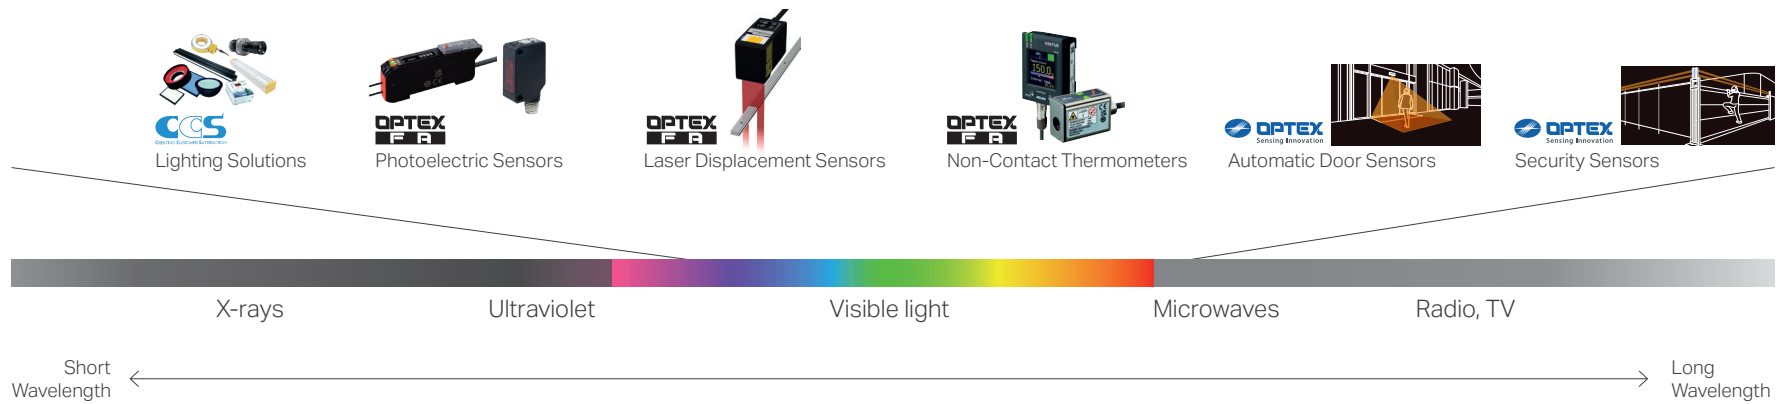

the industry's leading companies, we launched our original brand, FASTUS.

Today, OPTEX FA is one of the core businesses of OPTEX GROUP CO., LTD., a publicly listed company on the Prime Market of the Tokyo Stock Exchange.
